Magazine Distributor

I en Spice, 8 Como Avenue, Bradford, West Yorkshire, BD8 9PZ.

Chairman

David Senior, 23 Queens Drive, Carlton, Wakefield, West Yorkshire, WF3 3RQ. 0532 821818 Jurer & Registrar

Steven Langfield, 67 Orchard Grove, Bradford, West Yorkshire, BD10 9BT. 0274 615536

Secretary

John Allen, 14 Meadow Park Crescent, Pudsey, West Yorkshire, LS28 7Th.

Assistant Secretary

Chris Harper, 19 Poplar Crescent, Tingley, Wakefield, West Yorkshire, WF3

Public Relations Officer Gary Lewis, 2 Greenhills, Rawdon, Leeds, LS19 6NP.

Junior Committee Member

Chris Taylor, 15 Victoria Close, Yeadon, Leeds, LS19 7AU.

0532 504588

More articles on anything to do with aviation in Yorkshire are urgently needed for inclusion in the magazine. You may have hidden writing talents so why not put pen to paper and send in your masterpiece. If you can't think of items to write about on Yorkshire aviation, then send in an article for the "Out and About" section. If you can't do that, send in an odd snippet of information on sightings or in the area. Every member should be able to contribute something to the magazine at least once a year. Why rely on others to make the magazine; its the same names in the credits month after month. We cannot make payments for news as we are an amateur aviation group and everything concerned with the group has to be done voluntary. All magazine contributions, however small or large, are very much appreciated. Items for the June magazine issue should be sent to the editor to arrive not later than 5 June

Matings:- The next gathering is on the first Sunday in June at the Yorkshire Aero Club at 1500 hours (courtesy of the Directors). The subject will be on how to build your own plane and will feature the Mexborough headmaster Mr G Shield who hopes to fly in to Leeds/ Bradford in his Shield Xyla G-AWPN from Doncaster. A treat not to be missed! Coach Trips:- These are proving to be very popular, with the last trip to Biggin Hill being completely full. The next trip to Old Warden will be in the largest bus that we have had yet and will enable many of the Air Yorkshire membership to visit the vintage display at this Bedfordshire airfield. An application form accompanies this magazine issue,

The Paris Air Show charter from Leeds/Bradford on 28 May 1977 is now almost Air Trip:booked up (over two-thirds full). If you intend to go, send your deposit as quickly as possible so that we can see if a larger plane is needed for the charter. Don't delay or it might be too late:

hirport Timetables: - have not been published seperately as indicated in last month's magazine, but have been included in this issue at the front.

# SUMMER FIRPORT THMETHBLES

## MIRLINE NEWS

Aer Lingus Irish have had returned their two Boeing 737-248s that were leased to Egyptair. EI-ASC arrived back at Dublin on 22 March as SU-AYT and had its registration restored on 26 March, whilst EI-ASB arrived on 31 March as SU-AYX having its registration restored on 5 April. EI-ASH returned to Dublin on 14 April as G-GTAR after its lease to Transair and was first noted flying for Aer Lingus two days later in the banana colour scheme.

Air Anglia have returned the leased Argosy 100 G-APRL to Air Bridge Carriers due to poor freight loads being achieved on the routes and was positioned back to East Midlands on 27 March. Freight services to Amsterdam from Norwich and Aberdeen have since been suspended by the airline pending the introduction of a Friendship 200 freighter, one of the two aircraft recently aquired from Bangladesh Biman.

Herald 206 G-BCWE which had been leased from British Air Ferries for five weeks to operate the Leeds/Bradford - Amsterdam route was positioned back to Southend on 2 May. The second Bangladesh machine has entered service first and was prepared for service at Norwich by Air Anglia Engineering. G-BDVT (ex S2-ABL) entered service on 2 May in a summer temporary blue colour scheme and operated through Leeds/Bradford and Tees-Side on 3 May for the first time. The other aircraft G-BDVS (ex S2-ABK) is still with Fokkers at Ypenburg in Holland and is not expected to be in service until the middle of June at the earliest.

Operating through Leeds/Bradford during April were......

have had the tail taken off Viscount 802 G-AOHH in the hanger at Leeds/ British Airways Bradford, and sister-ship G-AOHK has had all the engines removed on the old apron in readiness to take the place of 'HH. In addition to the two Viscount 802 retirements mentioned in the last issue (see AY/76/34), G-AOHB arrived at Liverpool from Birmingham on 1 April.

have had Herald 214 G-ASVO painted back to their own colours British Midland Airways after the lease to Air Anglia, and was noted as such parked at After the recent lease of two Viscount 814s to British Airways East Midlands on 24 April. at Prestwick (see AY/76/35), a serious fleet shortage has occured which has necessitated the airline to lease a Viscount 838 (most probably G-BCZR) from Fields Aircraft Services.

Dan-Air Services HS.748 Srs.2 G-AZSU arrived at Manchester from Dinard on 29 March as A2-ABB after its lease to Air Botswana and subsequently paid its

first visit to Leeds/Bradford after the lease on 3 May.

HS.748 G-ASPL "City of Berne" had a starboard engine malfunction soon after take off on the DAO61 service to Cardiff on 3 May and successfully made a landing on a very wet Runway 33 on return to Leeds/Bradford. An engine change had to be carried out on the aircraft through the night in the British Airways hanger, and departed to Manchester the following day. and a many

Martinair Holland operated into Leeds/Bradford from Frankfurt on 26 April using their newest Fellowship 1000 PH-MOL. The aircraft brought in a full load of 65 passengers who were visiting a local firm, and departed to Amsterdam the following day using the flight number MP3793.

It is understood that further visits will be made to the firm in the very near future and therefore more Martinair charters could be a reality.

Peters Aviation operated a charter for a local football team on 10 April from Leeds/ Bradford to Groningen via Norwich with Heron 1B G-AXFH and returned the following day.

## 11/11/17/18

The Fire School at Catterick was reviewed on 1 March and revealed the following aircraft present. Hanger by the A.1:- Vampire T.11 XE851/B ex Air Traffic Control School, Sycamore HR.14 XJ380/S-M ex CPS, Buccaneer S.1 XN925/8087M ex Lossiemouth, Pembroke C(PR)1 WV754, Hunter F.6 cockpit section XF990/8007M, Canberra B.2 WH924 cockpit, Canberra B(1)8 WT362/R cockpit, and Meteor T.7 VW452/S cockpit. Outside in fenced enclosure:- Canberra B(1)8 XH228/B. Around fire practice apron: - Hastings C.2 WJ338 ex RRE Pershore, Shackleton MR-2Cs WL758/W (cockpit area badly burned) and WL755/L. On the hills:- Meteor ,7s WN310, WA697/7609M, and WL166. On the field:- Hastings TG536, Victor K.1A XH647 ex 232 OCU, Varsity T.1s WL629/K and WL422/B, and Hunter F.4 XF307/8002M.

Noted at Leeming on 22 April were Chipmunk T.10s WG407/81, WK633, and WK517/84 of the 9 Air Experience Flight. Various Bulldog T.1s were seen on circuit and formation flying training including XX538/45, XX520, XX527, XX629/V, and XX540/47. On the fire dump Victor B.1A XH165 still resides, while parked on the main apron was Argosy '855'. Several Jet Provost T.4s were flying including XP557/65, XP556/70, XR731/63, and XS218/61. A Jet Provost sporting the insignia of the Gemini aerobatic team was parked near the fire station. On the same afternoon Jaguar XX739 flew in wearing the colours of 6 Squadron complete with 'laser ranger nose'.

Several Hercules' operated out of Leeming during April. "Ascot 793", a C.1, was to Cambridge on the 9th. On the 12th, Belgian Air Force C-130Hs CH-03 and CH-10 were from and to Brussels Melsbroek, followed by CH-08 on the 13th.

On the afternoon of 6 April, Hunter T.7 XL591/82 arrived at Linton-on-Ouse from the 4 FTS at Valley. After landing it taxied over to the hanger and was towed inside.

Holme-on-Spalding Moor was visited by Basset CC.1 "Evergreen 52" on April 24 from Warton, whilst Iroquois UH-1D 60928 of the U.S.Army visited Menwith Hill on the 8th and 28th of April.

01

```
The Jet Provost squadron of the 6 FTS at Finningley has completelely re-equiped with the
JP 5B (with tip tanks). The re-equipment was complete by early January and comprises of
                   XW298/0 ex 1 FTS
XW307/S ex 1 FTS
XW311/W ex 1 FTS
                     XW304/X ex 1 FTS XW306/Y ex 1 FTS XW291/Z ex CFS
XW293/uncoded ex CFS
The first aircraft to be delivered was XW309/V, but was originally coded 'U' and was
shown in the static park at last year's Battle of Britain display.
The Varsity T.1 has finally been retired from the training role with the 6 FTS. Aircraft
known to have been in use during 1975/6 include WJ909/A, WF328/B, WJ896/D, WJ948/E,
WF369/F, WJ907/G, WL627/O, WL626/P, WF382/Q, WJ943/R, WF372/T, WJ915/W, WL668/X, WJ944/Y,
and WF414/CC. A farewell display was held at Finningley with WF382/Q and WL668/X on
2 April. The only Varsitys now remaining, WJ919, WJ920, and WF414, are all on the fire
dump along with an unidentified Jet Provost T.4.
Many of the Varsitys will be dispersed to Kemble, others to fire dumps, and fortunately
some are to be preserved. The Newark Air Museum at Winthorpe Airfield has aquired
WF369/F which was delivered from Finningley on 1 April by Sqn Ldr Kinnings, the CFI of
6 Sqn. The machine finally made its 7,612th landing and has 8,600 flying hours to its
credit. Another aircraft for preservation is WL626/P which has gone to the Midland Air
Museum, newly established at Coventry Airport. A Varsity was noted parked on the far
side if the field at Linton-on-Ouse and is believed to be WF382/Q.
The 6 FTS at Finningley has two Bulldog T.1s for navigator training, XX706/06 and XX708/
08, which were delivered about mid-January. These can be distinguished by having redictional
spinners, while the YUAS aircraft have white spinners. Chipmunk T. 10s with the 9 Air
Experience Flight are WG407/81, WK590/82, and WK638/84.
The HQ of 22 Sqn is at this south Yorkshire airfield whose Whirlwind HAR. 10s include
XP354, XR457, XP395, XJ429, XP299, XP351, and XR483. Currently on overhaul are XP299
and XR483 along with Wessex XR588 (all yellow colour scheme).
The Reid Aerobatic Trophy, and Inter University Air Squadron competition, was held at
Finningley on the 8th and 9th May. Present were the following Bulldog T.1s:-
                                          XX631/W
                                          XX633/X )
XX636/Y )
XX616/3 ) Manchester & Salford UAS
                                                   Northumbrian UAS

Jet Provost 5s XW357/5, XW375/10, XW420/8, XW422/3, and XW438/2.
The Museum has aquired Mosquito 35 TJ138/VO from Colerne, and most magazines say that the
Me163 from Colerne has also appeared at Finningley, although our correspondant has not
personally seen it. The Me262 is currently at the RAF Museum Hendon for the German
exhibition there. Still parked outside are Argosy XN819/819, Beverley XL149/X, and
Shackleton WR977/B. And now some 1976 Finningley visitors....

a brief history of the Bradford-Yorkshire Gliding Clubs 1930 to 1939 based on the memories and personal log book of a pioneer glider pilot and glider engineer

The early log books of the Bradford, Leeds Bradford and County Gliding Clubs were lost by the B.G.A. about 1933 and as very little material has survived from that period the following is set down by a founder member before it is lost forever. To save embarrassment of people still living, members initials only are sometimes used.

Interest in gliding only started in the West Riding in 1930 following the tour of two German pioneers, Kronfelt and Magersuppe who gave a successful demonstartion of soaring at Beansley Beacon; Kronfeld using his Wier and Magersuppe, a Professor. Both machines in their trailers were hauled to the summit by a tractor. Interest was enormous and six clubs were formed in a very short time.

The Bradford Club was formed at the old Mechanics Institute in Bradford (now pulled down) on July 25th e1930 and they were the last of the six to start flying, being the last to obtain a machine, a Dickson. This was presented to the Club by the local newspaper, the Yorkshire Observer, and they had their name in huge black letters under the wings. In order to get maximum publicity it was made locally by a local boat builder named Sutton from drawings issued by Flight in association with the BGA.

Soon had worked on float-planes at Lake Winderser. 1912 and he made the Dickson presunably as a spare time job, hence the delay. Very little was known about the art of building gliders or operating them at that time in the country. German builders favoured the nails or screws method and casein glue while British builders went in for liberal use of screws, tacks and a glue based on gelatine like Croid. This had started in 1916 and was not finally settled until 1946, a well known firm was using casein in 1946 long after Aerolite had become available. However, Sutton was 100% British and the Dickson was made with Croid glue, duralumin bolts and large numbers of solid brass screws. The result was a bill for £90, a German Zogling could have been built for £50 while the home-made Harrogate Dickson, which was doped with waterglass, cost about £13 for materials. However, the newspaper made the best of it to get their money's worth. The Dickson was formally presented to the club at a ceremony at the Pastures, Apperley Bridge on Saturday, October 11th 1930 in front of a large crowd estimated at 4000. This was only 6 days after the crash of the R101 and everyone stood in silence and bareheaded for 2 minutes as a mark of respect for the dead.

Magersuppe had come from Scarborough to test the Dickson and many of the crowd and even some club members expected him to soar and fly away like Kronfelt did at Beamsley Beacon, the pastures at Apperley Bridge were quite flat. This was a great appointment for many and the attendance was halved in a very short time.

In 1930 not many people possessed cars, I can only think of four members who had access to one, transport was quite a problem. One member came to the rescue, he was a designer for P. & M. motor-cycles and he coaxed a director to allow us the use of the works hack for touring. This was a mixed blessing! It was a powerful machine, a combination with a commercial sidecar, quite capable of towing the Dickson and trailer up a reasonable gradient, but ( and a large but ), it was also the model on which P. & M. tried out their new ideas and sometimes they were unsuccessful. One day, without warning, the front wheel came out of the forks and poor C took, a fearful toss; luckily he had no bones broken but when this came to the ears of the P. & M. management the priviledge was withdrawn. Transport remained a problem for a very long time. The question of a site was equally difficult, without doubt the best place for a Primary launching was Baildon Moor but this belonged to Bradford Corporation who absolutely forbade Sunday flying; evenings and Saturday afternoons were almost useless as: by y the time the Primary was rigged it was nearly dark.

For a long time 5. four clubs shared the site at Weeton, near Harrogate, which was quite suitable and an enjoyable time was had by all. Mr Addyman of the Harrogate Club put up a cup for annual competition by Primaries. This was won by Bradford and to the best of my knowledge has not been competed for since. This was reported in the press when it came to the notice of the landowner, the late Lord Lascelles, he stopped the lot on the grounds that it was spoiling the fox hunting.

By 1931 the Ilkley group had found and got permission to fly from a good site at Malham overlooking the Tarm. This was rather a long way to travel and remote but it had possibilities. A Northern meeting was held in the summer but noboby soared, they had no suitable machines, but a number of A and B Certificates were gained - not by Bradford however.

For some unknown reason the Bradford Gliding Club was not a member of the British Gliding Association and the Dickson did not have a B.G.A. C. of A., consequently flights on it did not qualify for a certificate. For this reason Bradford certificate numbers are higher than they need have been.

Malham had one drawtack - it was limestone country, rocks protruded from the grass like the tips of icebergs, they could not be moved by normal means so the Ilkley members tried to shatter them with explosives. Because they had no knowledge of such work they failed; nobody was hurt but the farm stock was badly upset. The farmer, who had not been consulted was justifiably incensed and turned everybody off so another site went for good. Near the end of 1931 the Bradford and Leeds Clubs joined and became known as the Bradford and County Gliding Club using the Dickson and the Leeds Reynard at Baildon Moor surreptitiously and storing both derigged on the site in a farmer's barn.

Flying progress was painfully slow, consulting my log book I see the total first year s time was only 3 minutes 37 seconds, the second year total was 7 minutes 10 seconds and the third year 15 minutes 38 seconds and that included a four minute glide down Sutton Bank - this was for a fully active member who hardly ever missed a meeting. Near the end of 1932 the members who had shrunk to a handful decided to build a nacelle on the Dickson. This was such a success that they went one better and started on a Hols der Teufel. Most of this was made in member's homes and finally assembled in a small underaker's workshop; each time a death occurred another part of the Hols had to be hung from the rafters to leave space for work, it took about six months to complete.

While this was being made the remains of the Cloudcraft Phanton were obtained, mainly for the sake of the ASI and the double launching rope that went with it. This machine was made in 1931 for Mr P. Mitchelmore to fly the Channel and win the Cellon prize; it was similar to the German Westpreusen brought over by Lyons Teas advertising team and for many years was the most advanced machine made in this country. With the benefit of hindsight Mitchelmore did not stand a chance but he was not given a chance to even try; while waiting for favourable weather on the cliff tops near Dover vandals wrecked his machine. Mitchelmore had very little money to spare, the builders had gone bank-rupt, recognised aircraft firms were very wary of tackling the job so the machine was shuttled about Southern England for quite a time before ending up on Patchcroft railway station where it was taken over by the Bradford Club. Even then its troubles were not over, the BGC had no premises of their own and the Phanton was moved from one wool warehouse to another as the merchants were induced to give it shelter and got tired of walking round it. Eventually it ended up at Slinsby's and was burnt during the war. The Phanton was made for the sole purpose of flying the Channel, it could not have made a good club machine hence the delay over repairs.

The highest point of Baildon Moor is Hope Hill which is 927 feet asl and the best ridge faces NW, 3 miles away upward is Ilkley Moor 1300 feet asl so a really good lift never develops, ideal for the old type of Primary Training but almost useless for soaring; this was not realised for a long time - members were learning the hard way. Only one C Certificate, Bradford's first, was flown at Baildon in ideal conditions by the late Rex Stedman.

On May 21st 1933 the author was launched in the nacelled Dickson just before a thunder-storm arrived. This was pure coincidence and what followed was not fully understood at the time. The cloud was giving strong lift and the Dickson stayed up nearly 2 minutes, nearly three times the duration of any previous flight on the site. A week later I tried to repeat the performance in normal weather and promptly spun in badly damaging the machine, the full extent of the damage to myself was only discovered 30 years later.

The following week the Hols was finished and found to be up to expectations , but for all practical purposes soaring at Baildon was just not possible.

On the 9th and 10th of September 1933 a two day meeting was held at Sutton Bank. The weather which had all summer been poor for soaring turned ideal and a good time was had by all. Bradford were very much the poor relations, only Stedman succeeded in soaring and landing back on top, the other three flew too fast and were soon in the bottom, undamaged but richer in experience.

Very little flying took place till the following Easter when the Hols and the repaired Dickson were taken to Dunstable, home of the London Gliding Club. No soaring was possible but the members had their first taste of winch launching. The high spot of the meeting was the private palmes; a well known pilot managed to get invloved in two crashes and get his car stolen in one day, luckily with no damage to himself. Another visit to Sutton Bank followed, this time the Hols ended up in a garden near the hairpin damaging a wing and the nacelle but the pilot was unhurt. More repairs. The 29th of April 1934 was a red letter day for the Club. Four members got their "C" andlanded back on top in one afternoon without damage.

Soon afterwards the remnants of the northern clubs pooled resources and the Yorkshire Gliding Club was formed; how the landowners, the Ecclesiastical Commissioners, were persuaded to allow Sunday flying I do not understand but they did. A primitive wooden hanger and club house were erected and work put in hand for a winch. After the National competitions the author was invited to stay as resident ground engineer, he accepted by this was later found to be a mistake. Sutton Dank was a much lonlier place in winter then than it is now and it had no water supply or postal services.

The Ilkley Club stopped flying and sold their Hols der Teufel to the Yorkshire Club. Led by the late Eric Addyman the Harrogate Club remained independent and their's are the only Yorkshire machines to survive today, being preserved by Aeroplane Collections.

Having moved from the gentle slopes of Baildon Moor to the precipice of Sutton Bank the C pilots were somewhat at a loss how to train new members. The answer was found by accident.

On September 16th 1934 four members turned up on an almost still Saturday afternoon, ridge soaring was impossible so the opportunity was taken to become familiar with the Ilkley Hols known as "The Bat" and the newly acquired winch. At the London Club at that time only the nost experienced pilots were allowed to fly circuits from a winch launch so the four Yorkshire pilots proceeded with great care, they were all C standard. Two members took turns practising starts while the other two rotated on the wing tip and cockpit. Once the winch drivers had the knack of tightening the rope and providing the correct airspeed short hops soon became a full circuit. It was really a le, here was an alternative form of training. The real drawback was lack of space, in this respect the two Hols were very suitable; they were so slow that a circuit could be flown in comfort on days when faster and heavier machines were just staggering off the ground.

Until the Kirby Kadetts appeared in early 1936 most of the training at Sutton Bank was done in Hols der Teufels. They were expensive because of the large wings, cumbersome and slow, took up a lot of space in the hangar but nobody was ever hurt in one. Hols were dumped, not landed, in back gardens, spun in, landed in trees and ravines but the pilot always walked out.

The next season, 1935, was the turning point for the British glider, the weather was reasonable, a small Government grant became available, Slingsby, Russell and Brown got into their stride and produced large batches of Falcon I 's and Grunau Baby II 's plus the prototypes Falcon III and Kirby Kite I. Aeroplane towing by the tail. I skid was proved to be practical and, most important of all, thermals were proved to be fact not a dream, in summer they were far more plentiful than expected. Last but not least the Collins variometer came on the market, it could be made to work and the price was within the reach of most clubs. The German Asconia had been on the market for years but its price was prohibitive for most British Clubs. Other variometers had been made, most using a coloured liquid but they were not very sensitive; some far seeing pilots were talking about audible variometers even in 1935 and were experimenting with equipment, which included a stethescope, without much success.

( to be concluded next month )

## LIGHT HYIHTION

Three new Popular Flying Association ventures in the journal's area to come to light are:-PFA10108 Motor Tudor, E.P.Affleck of <u>Doncaster</u>.

PFA10142 Colibri Mk.2, L.J.Welburn/Cleveland Sailplanes of Melmerby.

PFA10145 Evans VP.1, C.J.Painter of Sheffield.

On 27 April, Farm Supplies of Thirsk held a crop spraying demonstration at Tholthorpe with their Cessna 188 Agwagon G-AZZG and newly-arrived ex Royal Navy Hiller UH-12E helicopter G-BDRY. The company claims to spray more than 16,000 acres of land a year and the helicopter has been purchased due to its greater spraying efficiency in being able to hover over 'difficult' areas. The pilot of the Agwagon is a Norwegian, Harold Olsen, and the Hiller is flown by a New Zealander who only recently joined the company.

Delivered to Dishforth on 24 April from Manchester was Crosby Super BA-4B G-AYFW. Crosby Aviation's Travel Air G-ASYJ provided the crew ferry.

Cessna FRA150M G-BDOU was delivered by Northair from Leeds/Bradford to Birmingham on 5 April with the crew ferry being provided by Cessna FRA150M G-BDNR. Arriving around 9 April was Cessna 180J G-BDSI (see AY/76/36), which also accompanied Cessna F150M G-BDPG on 22 April on delivery from France.

The new BKS Air Surveys aircraft at Leeds/Bradford is now known to be Turbo Navajo G-BBEI and arrived at its base on 16 April.

Arrow Active 2 G-ABVE visited Leeds/Bradford on 29 April in formation with Chipmunk G-AORW. The active is the sole survivor of its type in Britain and was designed by Messrs Thornton and Oddy of the Arrow Aircraft Company in Leeds as a fighter trainer, making its first flight in 1932.

AA-5 Travelers in for checks at <u>Doncaster</u> during April were G-BAEJ, G-BBSA, G-BCCJ, and G-BCLJ. A visit was made on 16 March to note the hangered aircraft. In Flight-Line's hanger were Jodel D.140 G-AYFP (no wings or engine), Cessna F177RG G-AYTG (engine stripped), Cessna F172H G-AVUX, Jodel DR105A G-AXLS, Monsun G-AZOA, and Cessna F172G G-ATKU (no wings, emgine stripped). In Eastern Aviation's hanger were Cessna F150H G-AVUG, AA-1B Trainers G-BCIM G-BDLS G-BRUH, Cessna 175B G-ARFM, Jodel D112 G-AWIG, Mooney M20s G-ARWY G-ASUB, AA-5A Cheetah G-BDLO, AA-5 Traveler G-BCEO, AA-1 Yankee G-AYFX, Cherokee Arrow G-AVWR, Emeraude G-AYTR, Shield Xyla G-AWPN, and Cessna 336 G-ASLL (engine stripped).

# OYERHEHD

In the commercial sector, the month was started off by one of the many oil related charters in Euralair's Caravelle F-BTDL (1/4 DCS-POL1948) down Amber One from Aberdeen to Paris Le Bourget, whilst going the other way up the airway was Overseas Division TriStar G-BBAJ (6/4 POL1121-DCS) for a crew training detail at Prestwick. Jumbos about were Boeing 747s N748WA (7/4 OTR-MBK1603) to Minneapolis, D-ABYH of Condor (18/4 MBK-OTR1500), and DC-10 N102TV-(9/4 OTR-MBK1253) to New York. The older piston engined types were represented by Skyways Cargo Airline Dakota 4 G-AGJV (9/4 DCS-POL1745) bound for Ringway from Aberdeen, and Convair 440 Metropolitan LN-KLK (28/4 OTR1832-OLD) of Nor-Fly again bound for Ringway.

The biz-jets were as numerous as ever with HS.125s D-CAMB (2/4 MBK-OTR1704) off Ringway, N333ME (14/4 DCS-POL1822) from Keflavik to Luton and return (30/4 POL0827-DCS), and G-AWMS (26/4 DTY-POL0953) to Carlisle from Le Bourget. Falcon 20s were represented by D-CORF (3/4 DOG1729-NEW) from Luxembourg to Keflavik, I.B.M.'s N121EU (7/4 POL1109-DCS) to Edinburgh, Manchester bound OH-FFA (8/4 OTR1045-OLD), and Phillips' PH-ILY (23/4 DOG1444-NEW) for Keflavik. Other interesting ones were JetStar-8 N94K (5/4 POL0908-DCS), Lear Jet D-INKA (6/4 POL1705-OTR) off Warton, Lear Jet 35 OY-BLG (9/4 OTR1732-S.Fisher), JetStar-8 N3HB (11/4 POL1640-DCS) for Keflavik, Gulfstream 2 N214GP (21/4 OTR2104-DCG), and Lear Jet N256P (29/4 DCS-POL1057).

Interseting light aircraft to cross the local airspace were Cessna 340 D-ICOP (1/4 OTRO950-OLD) for Manchester, King Air D-IEHL (2/4 POLO842-DCS), Cessna 402 F-BRNX (2/4 POLO912-DCS), Cessna 401 LX-NTA (6/4 POL1042-DCS) for Prestwick, Commander 690A OE-FIX (14/4 POL1117-DCS), Bulldog G-BDIR on delivery (15/4 DCS-POLO940), and Aero Commander N57091 (13/4 OTR1632-OLD) for Manchester.

Just a small sample of the military were Pembroke WV701 (1/4 POL1140-DCS) calling "WTHWB", Belgian Air Force Hercules CH-10 (7/4 POL1450-Westgate) for Newcastle, West German Canbera D-9566 (12/4 OTR1324-DCG) off Warton, and French Navajo F-YEFV (13/4 DCS-POL1611). Credits: Trevor Smith, and Ian Carling.
